

# Sound output (use of music module)

Connect the music module, equipment and audio device as follows to **output** sound through the audio.

## Steps for usage:

1) with **USB** The data cable connects the music module to the computer.

Copy the audio files ( **.MP3** ) to the **01** folder ( music files can be downloaded directly or extracted from the video files using software )and named as follows:

->把音乐放入文件夹: **01 (必须是01文件夹)**

名称	修改日期	类型
01	2019/5/17 13:46	文件夹

序号需要与视频对应: 比如希望播放第一个视频播放Intro音频, 则命名为**001\_Intro**

名称	修改日期	类型
001_Intro	2019/4/20 11:27	MP3 文件
002_2727867092	2019/4/19 20:36	MP3 文件
003_4059254706	2019/4/19 20:36	MP3 文件
004_Mark Pride - River Flows In You ...	2019/4/19 20:36	MP3 文件

音频命名格式: **001\_ +名称**

**002\_ +名称**

序号

**003\_ +名称**

- 2) The music module connects the device and the speaker. The input port of the music module is connected to the output port of the equipment (the last slave machine **SY Sout of the multi-screen**), and the output port of the music module is connected to the audio. Please refer to the figure above for details.
  
- 3) Powers devices, music modules, speakers. After the device is turned on, the music module will play the corresponding music files according to the video tracks .
