

Upgrade device (update 3D_APP)

When do I need to upgrade my equipment?

- 1) Device program version is too old
- 2) Want to add some features to the device

Upgrade device (update 3D_APP) method:

- 1) Open the APP when there is a network, click -settings, find -**upgrade device** option, click to enter
- 2) entering the "Upgrade Device " option, enter -Download the update package, select the device model to be updated, and click "Download Update Package "
- 3) After downloading the update package, connect the mobile phone to the **WIFI of the device that needs to be updated**
- 4) After the device is successfully connected, go to: Settings- >Upgrade Device- >Upload Update Package, click "Upload Update Package"
- 5) Wait for the update to complete, the device will reboot the system
